SUMMARY

Senior Product Designer with 5+ years designing complex enterprise SaaS, AI-assisted workflows, and scalable product systems across startups and high-growth teams. Experienced leading 0→1 initiatives, platform redesigns, and design system creation in close partnership with product, engineering, and executive leadership. Known for simplifying complex workflows, aligning user needs with business goals, and building scalable experiences that improve usability, product adoption, and operational efficiency.

EXPERIENCE

Lead Product Designer

Medefy Health

01/2026 - Present

- Leading product design across Texoma, Medefy's next-generation platform replacing the legacy internal care guide tooling and consumer-facing mobile experiences.
- Contributed to the redesign of the internal SaaS care guide platform while leading UX for the new member mobile app focused on AI-assisted communication, escalation workflows, and trust-building healthcare experiences.
- Established scalable design system foundations supporting accessibility, light/dark themes, and cross-platform consistency across iOS and Android.
- Led a WCAG 2.1 AA accessibility audit across legacy mobile applications, identifying compliance gaps and driving system-wide recommendations for color, contrast, and component accessibility.

Lead Product Designer (Contract)

Kindness.AI

08/2025 - 12/2025

- Established Kindness.ai's product design infrastructure from the ground up, including scalable Figma systems, component architecture, design tokens, and standardized workflows.
- Revamped the product's information architecture, inbox workflows, message threading, labeling, filtering, and AI-assisted experiences for high-volume communication environments.
- Aligned design systems with production, enhancing consistency, delivery speed, and collaboration with engineering.
- Designed AI-driven tools for auto-labeling and search, reducing manual effort and enhancing data retrieval.

Senior Product Designer

TruOps Cyber Risk Management

05/2023 - 06/2025

- Led the end-to-end redesign of the TruOps enterprise SaaS platform, transforming complex GRC workflows into a more intuitive and scalable product experience.
- Conducted customer interviews, usability testing, stakeholder workshops, and workflow analysis to identify friction points and validate product decisions across enterprise user groups.
- Built and implemented a scalable design system that improved UI consistency, streamlined developer handoff, and accelerated cross-functional delivery.
- Used data-informed design decisions, A/B testing, and iterative UX improvements to simplify navigation, improve task completion, and reduce workflow friction across the platform.

Lead Product Designer

Fortress Information Security

11/2021 - 02/2023

- Led UX/UI strategy and directed a team of designers across cybersecurity and vendor-risk management platforms.
- Designed large-scale dashboard and workflow experiences focused on real-time supply chain risk visibility, vendor intelligence, and operational decision-making.
- Established scalable design systems and reusable UI patterns that improved consistency across complex enterprise applications.
- Partnered with leadership, product, and engineering teams to modernize legacy workflows, improve usability, and support platform scalability in regulated environments.

UX/UI Designer (Contract)

Groove.Co

08/2021 - 11/2021

- Designed and launched responsive mobile SaaS experiences focused on onboarding, usability, and sales engagement workflows.
- Collaborated with PM's and engineers to translate complex product requirements into intuitive mobile-first experiences.
- Delivered wireframes, prototypes, and implementation-ready UI assets aligned with product and brand goals.

EXPERIENCE

UI Designer (Freelance)

CompanyCam

05/2021 - 08/2021

- Increased field-service tool efficiency by 75% through workflow improvements and interface updates on mobile and web.
- Created reusable UI patterns and streamlined user flows to improve efficiency, usability, and product consistency.
- Collaborated with product and engineering teams to refine implementation details and support rapid iteration cycles.

UI Designer (Freelance)

American Estate & Trust

02/2021 - 05/2021

- Designed interfaces for customer-facing financial tools dashboards with a focus on clarity, accessibility, and simplification.
- Developed wireframes and interactive prototypes to validate workflows and gather stakeholder feedback prior to development.
- Modernized legacy UI patterns to improve readability, reduce cognitive load, and support more intuitive user interactions.

KEY PROJECTS

Medefy Health – Texoma Mobile Care Platform & Accessibility Modernization

- Led and designed the next-generation consumer mobile experience for Texoma, focused on AI-assisted healthcare communication between members and care guides. Created mobile workflows for live chat, escalation states, conversation management, trust-building UX patterns, and real-time communication experiences within a modern healthcare platform.

Kindness. Ai – AI-Powered Inbox, Design System & Product Infrastructure

- Established the full product design foundation, including Figma organization, component libraries, design tokens, variants, and design-to-development handoff standards. Redesigned core inbox workflows including message threading, filtering, labeling, search, and AI-assisted auto-labeling to reduce manual organization work and improve usability for high-volume communication teams.

TruOps – Enterprise GRC Platform Redesign

- Led the end-to-end redesign of a complex governance, risk, and compliance SaaS platform, transforming fragmented workflows into a cleaner, more intuitive enterprise experience. Introduced a scalable design system, simplified navigation, improved task flows, and partnered closely with leadership, product, and engineering to align the platform redesign with retention, usability, and go-to-market goals.

Fortress Information Security – Asset-to-Vendor Network Redesign

- Led design strategy and directed a team of 6 designers on Fortress' A2V platform redesign, transforming complex vendor-risk and cybersecurity workflows into a more intuitive enterprise experience. Simplified access to sensitive documentation, improved dashboard usability, established scalable UI patterns, and partnered closely with leadership and engineering to balance strict compliance requirements with usability and platform growth.

EDUCATION / CERTIFICATIONS

UX/UI Design Certificate

Thinkful

07/2020 - 12/2020 Denver, United States

SKILLS/TOOLS

Product Design & Strategy

- Product Design, UX Strategy, Product Strategy, Design Systems, Information Architecture, Interaction Design, User-Centered Design (UCD), Enterprise SaaS, AI-Assisted UX, AI Workflow Design, Accessibility Design, WCAG 2.1 AA, Cross-Functional Collaboration, Stakeholder Alignment

Research & Validation

- User Interviews, Customer Research, Usability Testing, A/B Testing, Heuristic Evaluation, Journey Mapping, User Flows, Data-Informed Design, Google Analytics

AI, Systems & Prototyping

- Figma, AI-Assisted Design Workflows, Prompt Engineering, Design Tokens, Component Libraries, Interactive Prototyping, Wireframing, Developer Handoff, Design Documentation, Design-to-Development Workflows

Tools & Technical Skills

- Figma, Jira, Confluence, Miro, Adobe Creative Cloud, Framer, Docker, Claude Code, GitHub, Visual Studio Code
